

Customer Pyramid

Customer Value Distribution Across the Customer Base

Total Revenue	Total Customers	Average CHI	Average PDI	Average Purchase	High Commercial Loyalty%
\$233.08K	3.90K	70.95	28.44	\$59.76	18.05%

Key Insights:

- Moderate customers comprise over half of the customer base.
- High-value customers generate strong revenue despite a smaller population.
- Low-value customers represent only a small proportion, suggesting customer acquisition quality is already reasonably good.
- The biggest commercial opportunity is upgrading Moderate customers into the High segment.

Promo Dependency vs Retention

Identifying Genuine Loyalty vs Discount-Driven Purchases

Commercial Distribution

Retention Profile

Behavioural Mix within Commercial Loyalty

Revenue Contribution by Loyalty Mix

Key Insights

- **High Commercial Loyalty** customers exhibit the **lowest promotion dependency**.
- **Moderate** customers form the largest customer segment and represent the **highest-value retention opportunity**.
- Customers in the **High Promotion Tier** are considerably more discount-driven.
- Future retention strategies should focus on **converting Moderate customers into High Loyalty customers**.

Revenue by Region (Interactive Map)

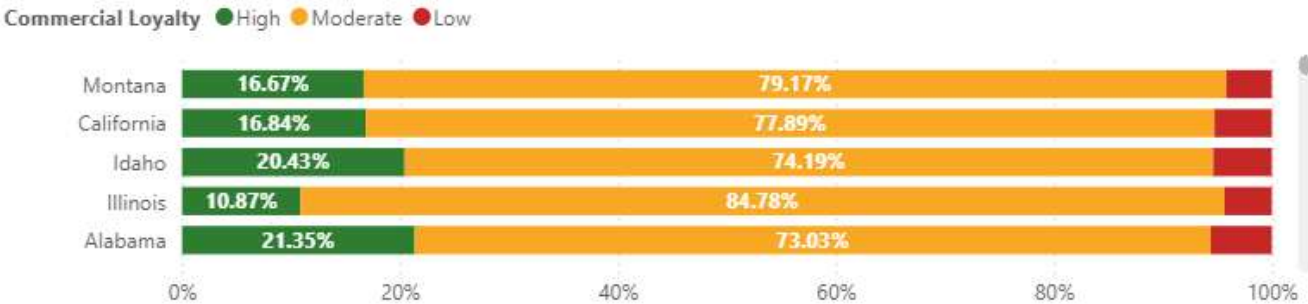

Revenue by Region

Average Promotion Dependency by Region

Commercial Loyalty Distribution by Region

Key Insights

- Regions with **high revenue and low promotion dependency** represent the strongest organic demand and should be prioritized for expansion.
- High-revenue regions with **high promotion dependency** may be overly reliant on discounts, indicating potential margin risk.
- Regions dominated by **High Commercial Loyalty** customers are ideal candidates for premium products and long-term retention initiatives.
- Marketing investments should focus on strengthening organically performing regions before increasing promotional spending in discount-driven markets.

Category Funnel

Identifying Entry-Point and Retention Product Categories

Total Revenue

Total Customers

3.90K

Average CHI

70.95

Average PDI

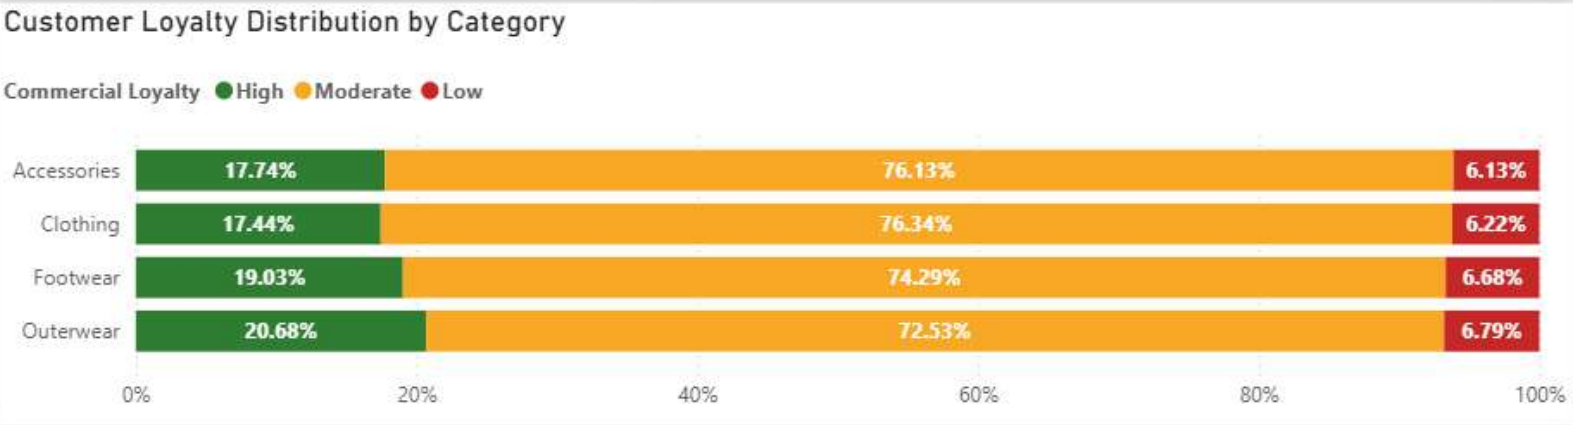

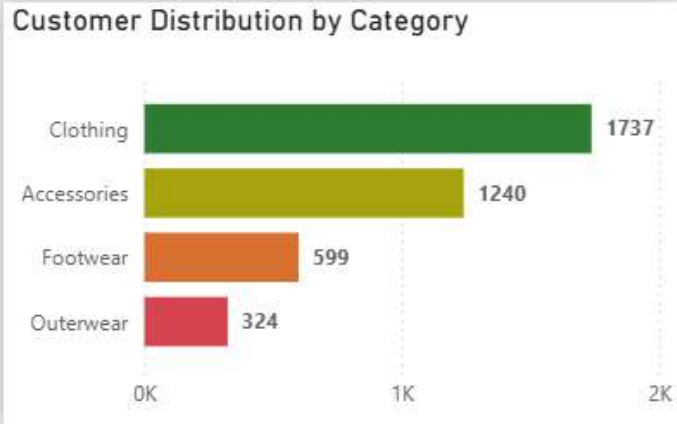

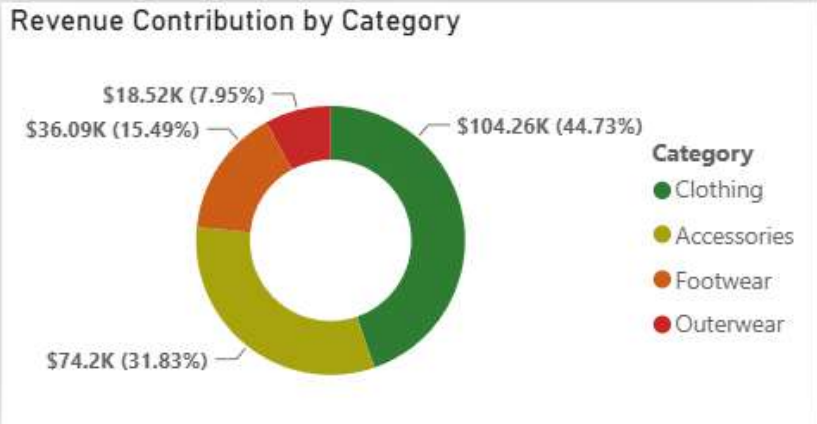

28.44

Average Purchase

\$59.76

Best Performing Category

Clothing

Key Insights

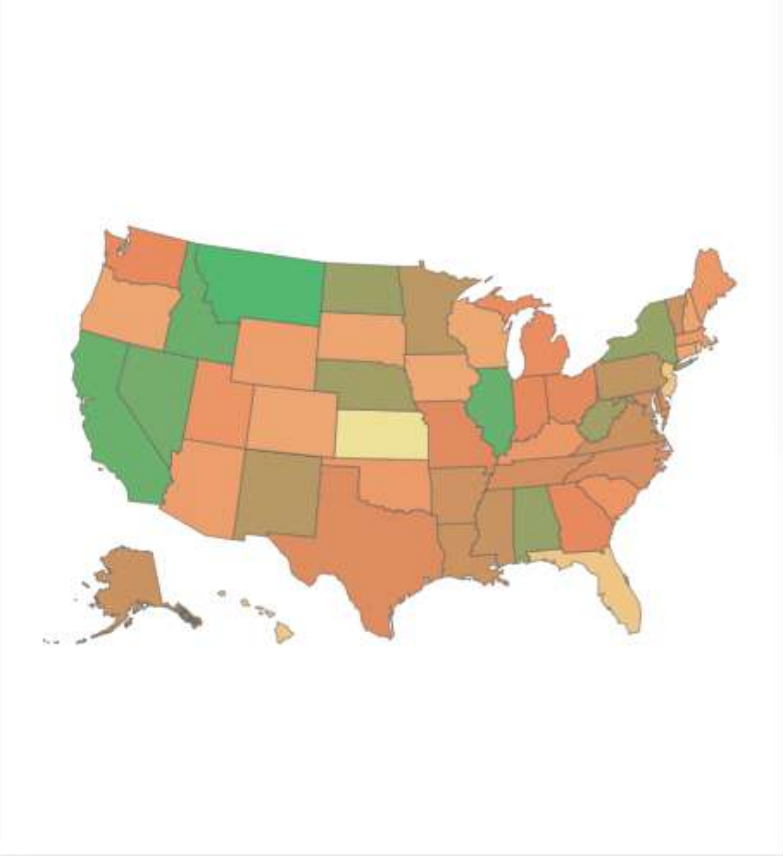

- Categories with the highest previous purchases function as **retention categories**, attracting repeat customers.
- Categories with lower purchase history serve as customer acquisition or **entry-point products**.
- Categories combining high customer health and high revenue are **premium growth opportunities**.
- Marketing efforts should prioritize moving customers from entry categories toward retention categories.
